

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I NEVER THOUGHT I WOULD AGREE WITH THE NEA ON ANYTHING!!!

I happen to use a Trac phone; it is the only way that I can afford the "luxury" of a cell phone. The expense incurred at present is already more than I would like to pay for such services. I have relatives in remote farming areas and others living on limited means.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Paulette Anderson
